

# Sentinel Hex Beam

Single Band

Based on the original design by G3TXQ

## Specifications

Gain	6.1 dBi
Front/Back	Peak > 20dB
VSWR	Less than 2:1
Wind Load Area	< 5 sq ft
Power handling	<b>full legal limit</b>

## Features:

- Low SWR
- No tuning required, just plug and play
- Improved broad band response over original hex beam design
- Performs well at lower heights
- Handles full legal limit of power
- Small physical foot print
- Light enough for a push up mast
- Symmetrical shape withstands wind better
